Hand Geometry Technology

The HandPunch GT-400 uses hand geometry, the length, thickness, and curvature of fingers (or simply size and shape of a user's hand), to verify each employee. Hand geometry technology takes measurements of the hand and converts them into a 20-byte numerical template. This template is then matched with the enrollment template and the user's identity is verified. Hand geometry technology is not affected by tattoos, jewelry, fingernails, lotions, dirt, smudges or dust. The reading and verification process takes less than a second with impeccable reliability.

Applications for use

The G-Series GT-400 HandPunch is a versatile and flexible workforce management solution that lends itself to a diverse array of facilities and workgroups.

Ingersoll Rand's Security Technologies Sector is a leading global provider of products and services that make environments safe, secure and productive. The Sector's market-leading products include electronic and biometric access control systems; time and attendance and personnel tracking systems; mechanical locks and portable security, door closers and exit devices, steel doors and frames, architectural hardware and technologies and services for global security markets.

HandPunch GT-400
Delivering the Upper Hand in Workforce Management

The G-Series GT-400 HandPunch coupled with a software provider, is—hands down—one of the most effective solutions for workforce management. What does that mean for you? It means daily, tangible benefits such as accurate record keeping, risk mitigation, and increased employee productivity that drive your bottom line and provide peace of mind for you and your employees.

The HandPunch GT-400 uses the size and shape of each employee's hand for verification, so it's fast, efficient and easy to use. It functions well in environments where dirt, dust, grease, moisture, swelling, and dryness are present. For this reason, HandPunch technology is the ideal biometric for all applications. With a large LCD screen and programmable soft keys, the HandPunch provides a conduit for employee communication right at the terminal. It also delivers a host of other benefits that include:

- **Reduced payroll and administrative costs**
  - Reduced payroll and administrative costs drastically reduce the time and labor associated with processing and maintaining employee payroll records.
  - Reduced payroll and administrative costs dramatically reduce the time and labor associated with processing and maintaining employee payroll records.
- **Flexible Programming**
  - A Linux-based operating system allows for maximum programming flexibility and differentiation.
- **Advocate for Productivity**
  - Allows for remote diagnostics and field upgrades.
- **Easy Enrollment**
  - The large display screen and ATM-style design provides self-service functionality.
- **Real-Time Decision Making**
  - Push technology allows communication to occur quickly and efficiently.
- **Advocate for Productivity**
  - Antimicrobial coating embedded in platen, keypad, and plastics inhibits growth of bacteria.
- **Open Architecture Design**
  - Linux-based operating system enables maximum programming flexibility and differentiation.
- **Antimicrobial Protection**
  - Antimicrobial coating embedded in platen, keypad, and plastics inhibits growth of bacteria.

Take a look at the features, and you will see that the HandPunch GT-400 is the ideal solution for taking the work out of managing your workforce.

The Schlage HandPunch GT-400 delivers the upper hand in workforce management.

The Schlage G-Series GT-400 HandPunch, partnered with a software provider, is the ultimate workforce management solution. What does that mean for you? It means daily, tangible benefits such as accurate record keeping, risk mitigation, and increased employee productivity that drive your bottom line and provide peace of mind for you and your employees.

The HandPunch GT-400 is so efficient that, when used properly, most customers realize payback on the cost of hardware in less than nine months. So... how about giving us a hand?

**HandPunch GT-400 Delivering the Upper Hand in Workforce Management**

- **Increased Up-Time**
  - Upgrade remotely — Download new firmware and application functionality through an Ethernet connection, without removing the GT-400 from the wall and disrupting your productivity.
- **Improved Serviceability**
  - Remote diagnostic capability allows for troubleshooting and maintenance at the HandPunch without removing it from the wall.
- **Employee Self-Service Kiosk**
  - Large display field allows information—such as lists and personal messages—to be displayed.
- **Programmable ATM-style soft keys facilitate functionality.
- **Real-Time Communication**
  - Access information in real-time with push technology, making your system more efficient and productive.
- **Open Architecture Design**
  - Linux-based operating system enables maximum programming flexibility and differentiation.
- **Antimicrobial Protection**
  - Antimicrobial coating embedded in platen, keypad, and plastics inhibits growth of bacteria.
